

SAASNOW

SaaSNow offers managed SAS Viya environments in a unique monthly model. SaaSNow has the following offerings:

- SaaSNow
SaaSNow provides SAS® Viya® as a Service as a managed solution, including a monthly SAS Viya license for any combination of solutions. SaaSNow enables scalable and flexible environments for self-service business intelligence and advanced analytics.
- SaaSNow Flexible
SaaSNow Flexible is the ideal solution if you already have a license available, but want to use our services for hosting your environment. Any SAS® Viya® 3.4 license is accepted, independent of the type of contract (Customer, Reseller, MASP, etc.).

SaaSNow is hosted from datacenters in Amsterdam (Netherlands) and New York (United States). SaaSNow also supports deployment in the Public Cloud.

WHY PUBLIC CLOUD

- Compliance
Some of our customers have specific (compliance) needs, making them unable to move their SAS environment to a location outside their own country.
- Latency
Although most SAS products are not heavily influenced by latency as most actions are executed on the server, some specific use-cases have extreme latency requirements. Deploying closer to the customer, Public Cloud deployments allow us to bring environments closer, making even low-latency requirements possible.
- GPU Processing
The newest SAS solutions provide deep learning and enable advanced AI applications, SaaSNow in public cloud provides environments with GPU processing capabilities that can be leveraged by SAS.

AVAILABILITY

SaaSNow Public Cloud offering is available in the following regions;

- Canada (Toronto)
- Japan (Tokyo)
- South-East Asia (Singapore)

More regions will be added on-demand.

PRICING

Hosting in our datacenters in Amsterdam (AMS) and New York (NY) remains the most cost-effective deployment option for your SAS Viya environment. Pricing for SaaSNow Public Cloud is determined per region, and can be requested at info@saasnow.com.

Two pricing models are available for SaaSNow Public Cloud

- Always on
Similar to our datacenters in Amsterdam and New York, SaaSNow Public Cloud can be configured to be available 24/7.
- On demand
To save cost on infrastructure, SaaSNow Public Cloud can be configured to be available 12/5, 12 hours every business day.

FEATURE COMPARISON

	SaaSNow AMS and NY	SaaSNow Public Cloud regions
The basics		
Deployment in 1 day	V	V
Contract term	Monthly, Yearly	3 months (On demand) Yearly (Always on)
Secure SAS environment	V	V
State of the art SAS Viya platform	V	V
Knowledgeable support	V	V
SFTP connection for data transfer	V	V
Hosting		
Sizing	Up to 128 cores Fixed configurations	Unlimited cores Tailor-made configurations
Multi-tenant SAS Viya deployment	V	V
Multi-server SAS Viya deployment	V	V
Additional disk space	V	V
GPU support	Private Cloud	V
Software		
SAS Viya:	V	V
- SAS Visual Analytics		
- SAS Visual Statistics		
- SAS Data Preparation		
- SAS Data Quality		
- SAS Visual Text Analytics		
- SAS Visual Data Mining and Machine Learning		
- SAS Visual Forecasting		
- SAS Econometrics		
- SAS Optimization		
- SAS/ACCESS engines		
Any SAS Viya product combination	V	V
Optional addons		
VPN (site2site, point2site)	V	V
Custom authentication (Single sign on, custom LDAP(S), Kerberos)	V	V
SAS Viya quickstart	V	V
Custom domain names	V	V
